Question 12

I am going to read you a list of promises that Trump and Republicans made on the campaign trail but have yet to accomplish. For each, I'd like you to consider how you would feel if that promise is not fulfilled by the congressional elections in November 2018. For each, please tell me if you don't want them to follow through on the promise, if you will be disappointed but vote for Republicans anyways if this change doesn't happen, or if you will be so disappointed that you may not vote for current Republican office holders again. We'll start with the promise to overhaul the tax code. If in a year and a half, we have not overhauled the tax code...
